

New CLIP CLAMP for T-post

New improvement for those of you who have T-Post as fencing post

The new CLIP CLAMP is so strong that only one is enough to tighten HorseGuard [#8 insulator](#)

Pinch the new CLIP CLAMP
And when it's there its there !

One CLIP CLAMP is enough in normal weather area

In stormy area you might Use 2 CLIP CLAMP

Or even 3 if you expect tons of snow

To remove CLIP CLAMP you will need a big screw driver to lever it off

One of the trick is the hole in the back of the #8 insulator that fits one stud of the T post
