

The Crimper has 5 different functions

Measure and cut necessary wire needed

Please cable into the "STRIP" slot

Position the crimper tool on top of a strong post or hard surface

Gently knock to cut cable

Pull the cable to remove the cable insulation

Fold the exposed cable over the insulation

Push the cable until it is completely on lug

Place the lug into the "CRIMP" slot

Hit HARD 6 or 7 times to ensure proper crimp

You have completed a professional crimp

Other uses for the Crimper tool:
Handy socket wrench

Bit holder

for use as a screw or torx driver
